

**Fourteenth Special Master Report (Filed Feb. 16, 2010)**

Area	Compliance	Source	Page
<b>MENTAL HEALTH</b>			
Organizational Structure	Partial	"Across the state, core SBTP [Sexual Behavior Treatment Program] therapy groups are comprised according to youth correctional counselor caseload, rather than according to clinical judgments about group composition."	2
Integration of Staff	Non	"The need for better collaboration among clinical and facility staff is evidenced in many ways."	2
Time-Adds	Non	"Facility staff regularly give youth on the mental health caseload time adds as punishment for disciplinary violations which are reversed on review by the chief psychiatrist."	3
Protocol	Non	"The experts consider the protocol almost counter-productive, as it indicates that facility staff may evaluate the judgments and directions of clinical staff."	4
Suicide Prevention, Assessment and Response	Non	"The new policy does require prompter clinical attention for potentially self-harming youth and more oversight by DJJ's mental health leadership. The experts have not yet assessed the effects of the policy's implementation, however."	9
Training	Non	"...the training in the treatment and clinical management of self-harming and suicidal youth remains overdue."	11
Empirically-based Treatment for Self-harm	Non	"DJJ's failure, until recently, to take effective steps to train staff in the effective treatment of intentionally self-harming youth is an example of DJJ's failure to prioritize and to take decisive, effective action in important areas."	12
Use of force	Partial	"DJJ directed facilities to implement a new use of force policy in mid-April 2009. Multiple specific incidents of use of force on mentally ill youth have come to the attention of the experts, plaintiff's counsel, and OSM since that time."	14
Data and Tracking System	Non	"DJJ lacks a single, reliable source of comprehensive data regarding self-harm incidents among DJJ youth."	16
IT Resources	Non	"... insufficient information technology (IT) staff were assigned to mental health for these purposes. Currently, only one IT staff member is assigned to mental health."	18
Licensed Bed Care	Non	"In the long-term, CDCR's repurposing of Heman G. Stark from a youth to an adult facility changes will require relocation of the licensed beds that accounted for 68% of DJJ's licensed bed admissions."	22
Staffing	Substantial	"The experts have found that DJJ is substantially compliant with requirements concerning mental health staffing..."	23
Residential Treatment Units	Substantial	"The experts have found that DJJ is substantially compliant with requirements concerning ...the number and size of residential mental health treatment units."	23
Diagnostic Screening	Substantial	"The experts have found that DJJ is substantially compliant with requirements concerning ...most elements of diagnostic screening."	23
